PixSell 3

iPad & iPhone product catalogue
and sales order app

What's new in version 3.28
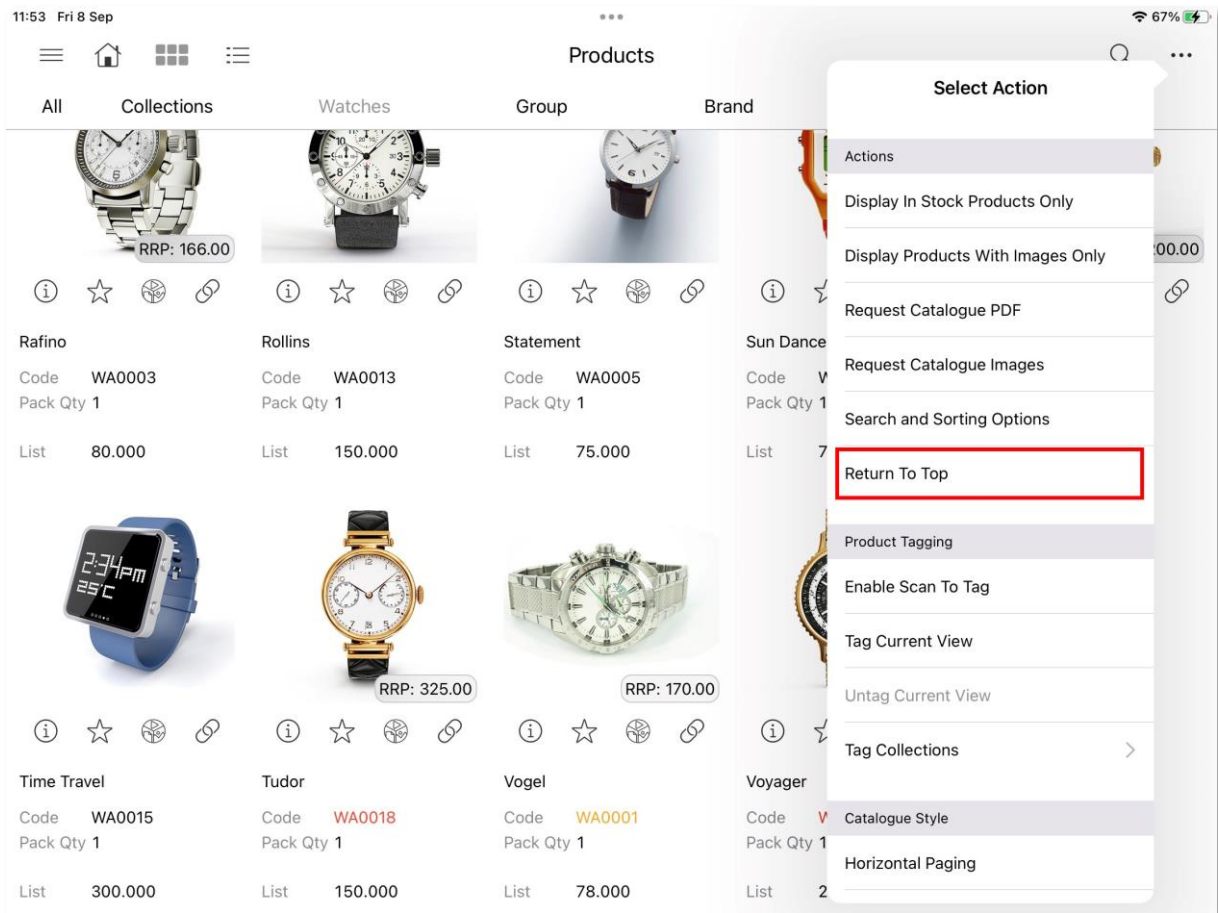

Table of Contents

1 UPDATES

1.1 'Return To Top' option in the Catalogue and Product List

The Catalogue and Product List menus now contain a 'Return To Top' option, which allows to quickly get back to the beginning when you've scrolled quite far down a list of products.

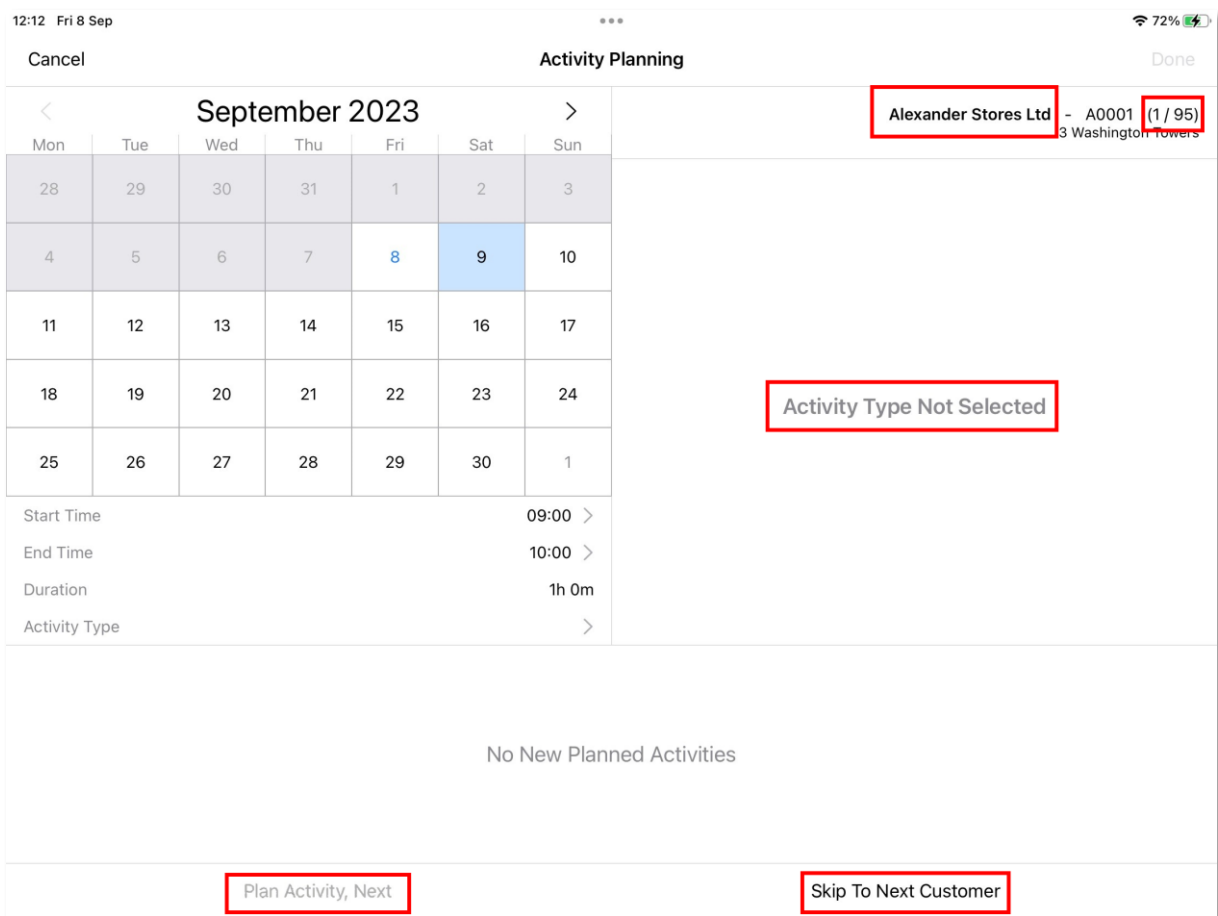

Description	Comment
Type	New feature
Other data	No additional data required
Deployment	This is available to everyone

1.2   Enhancements to the planning of multiple Activities

We've made a number of improvements to the planning of multiple Activities. When long pressing the calendar icon in the customer list, the option is now called 'Plan Multiple Activities'. On the new Activity Planning screen, the customer name is now shown as well as its position in the current filtered list of customers. It's now more obvious that you have to select an Activity type first, and the create button at the bottom has been renamed to clarify that it plans the Activity, then moves to the next customer in the list. Finally, there is a new button at the bottom right so you can skip to the next customer in the list without planning an Activity for the current customer.

Description	Comment
Type	Enhancement to existing feature
Other data	No additional data required
Deployment	This is available to everyone

1.3   Other Improvements

- Some Catalogue views that were very rarely used have now been removed for simplicity and better performance. The views removed were the Split View (apart from when seeing Also Bought or Linked products), as well as the options to change the number of products for Horizontal Paging (now only 8 products per page available) and Vertical Scrolling (now only 5 columns available).

1.4   Bug Fixes

- The Fast Lines functionality was not warning when trying to enter invalid quantities.

2 UPDATE HISTORY

Summary of features and changes included in recent PixSell 3 releases:

3 BEFORE YOU UPGRADE

3.1 Note to PixSell 3 administrators

Whilst we make every effort to thoroughly test each new release, there is always scope that upgrading without testing may have an adverse impact on your business processes.

Our advice is that you review this version before instructing users to upgrade. This will ensure minimal interruption to your PixSell 3 services.

3.2 Testing advice & best practice

i)   Please disable the automatic update of Apps from the App Store on all devices using the PixSell 3 application in a live environment.

ii) We would recommend that any new release is thoroughly tested before rolling out all devices by processing examples transactions that confirm to your most common workflows – for example:

Upgrade a single device and process a transaction that applies:

- Line discounts
- Order discounts
- Suggested orders
- Duplicate orders
- Promotions
- Multi-language/Multi-currency variants
- Planned re-orders and In-store counts

If you have any queries, or require any further information, please contact Aspin support.
