1 UPDATES

1.1 Ability to associate photos to forms

A new type of field can now be added to customer forms, allowing to add photos that are associated to the form. Simply press the camera icon, and choose to load photos from the camera or the photo roll.

Description	Comment
Type	New feature
Other data	No new data required
Deployment	This is available for everyone using CUSTOMER forms with the Forms module, please phone our Service Desk to find out how to use this

1.2 Other Improvements

- On the Customer screen, the 'By Sales Rep' quick filter and the 'Sales Rep' advanced filter can now include reps assigned to prospects in all circumstances, rather than just reps assigned to customers.
- Performance improvements when loading dashboard reports.

1.3 Bug Fixes

- Resolved a couple of issues with advanced filters when selecting more than one at a time.
- Addressed issues when replacing a product's image with another image.
- Various small UI fixes and improvements, mostly in dashboard reports.

3.34	January 2024	Bug fixes and maintenance.

3 BEFORE YOU UPGRADE

3.1 Why upgrade?

Keeping PixSell up-to-date is crucial for several reasons:

- Our updates often include important security patches that protect against new vulnerabilities and threats. By staying current, the risk of malware, hacking, or data breaches is reduced.
- PixSell updates typically introduce new features, improvements, and bug fixes that enhance usability and performance. Outdated versions of PixSell may experience compatibility issues with newer operating systems or devices, leading to crashes or malfunctions.
- Our developers frequently optimise apps for speed and efficiency through updates, ensuring a smoother and more enjoyable user experience.

Therefore, regularly updating mobile apps is essential for maintaining security, functionality, and overall user satisfaction.

3.2 Supported devices

At present, in order to receive updates for PixSell 3, the user devices must be on iOS 15.5 or above.

In the future we plan to move this to iOS 16.0. In doing so, any user on an iPad Air 2 or iPad Mini 4 will continue to be able to use PixSell but will cease to receive updates.

3.3 Testing advice for PixSell administrators

Whilst we make every effort to thoroughly test each new release, there is always scope that upgrading without testing may have an adverse impact on your particular business processes. Our advice is therefore that you review this version before instructing users to upgrade. This will ensure minimal interruption to your PixSell 3 services.

As best practice, we therefore recommend that you disable the automatic update of apps from the App Store on all devices using the PixSell 3 application in a live environment, and that you ensure that any new release is thoroughly tested before rolling out all devices by processing example transactions that conform to your most common workflows.

For example, upgrade a single device and process a transaction that applies:

- Line and order discounts
- Promotions
- Multi-language/currency variants
- Planned re-orders, Credits, or In-store counts
