# 1   UPDATES

## 1.1   Ability to request CSV exports from SkooCloud

We've added the ability to request SkooCloud CSV exports from the Catalogue and Out Tray, in the same way as current PDF and Images exports. This requires you to have previously created a CSV data template in the SkooCloud PIM. When you have a filter selected and have less than 500 products showing, you will be able to press 'Request Catalogue CSV' from the action menu. Then simply select the name of your CSV template, type an email address, enter a title, and press OK. The entered email address will then receive an email with a link to a CSV file containing the relevant details of all the filtered products in the catalogue (or all the transaction products when doing this from the Out Tray).

| Description | Comment |
|---|---|
| Type | New feature |
| Other data | Requires the setup of a CSV data template in the SkooCloud PIM |
| Deployment | This is available to everyone using SkooCloud Plus and Enterprise |

## 1.2 Other Improvements

- We've added a new type of form field that allows the selection of all delivery addresses for the current customer. This could be useful if when filling in a form, you'd like to record some information against a specific delivery address. Please speak to your account manager if you'd like this to be configured.

## 1.3 Bug Fixes

- We've reinstated the ability to discount orders by 100% at header level.
- When selecting a site address on an activity, the selected address will now show in the calendar for the completed activity, rather than always showing the main customer address.
- When using the 'Add to Order' option to add items from a previous order, only the filtered items will be added. For example, if filtering to show only undespatched lines, only those lines will be added rather than adding all lines.

## 2 UPDATE HISTORY

Summary of features and changes included in recent PixSell 3 releases:

| Version | Release date | Summary |
| --- | --- | --- |
| 3.53 | May 2025 | -Charts re-design<br>-Other Improvements<br>-Bug Fixes |

# 3 BEFORE YOU UPGRADE

## 3.1 Why upgrade?

Keeping PixSell up-to-date is crucial for several reasons:

- Our updates often include important security patches that protect against new vulnerabilities and threats. By staying current, the risk of malware, hacking, or data breaches is reduced.
- PixSell updates typically introduce new features, improvements, and bug fixes that enhance usability and performance. Outdated versions of PixSell may experience compatibility issues with newer operating systems or devices, leading to crashes or malfunctions.
- Our developers frequently optimise apps for speed and efficiency through updates, ensuring a smoother and more enjoyable user experience.

Therefore, regularly updating mobile apps is essential for maintaining security, functionality, and overall user satisfaction.

## 3.2 Supported devices

PixSell 3 now requires iOS 17 or above. This allows us to take advantage of the latest features and security enhancements, ensuring a smoother and more reliable experience. If your device does not support iOS 17, you will still be able to use older releases of PixSell 3 (up to version 3.50), but newer updates and features won't be available.

## 3.3 Testing advice for PixSell 3 administrators

Whilst we make every effort to thoroughly test each new release, there is always a possibility that upgrading without testing may have an adverse impact on your particular business processes. Our advice is therefore that you review this version before instructing users to upgrade. This will ensure minimal interruption to your PixSell 3 services.

As best practice, we therefore recommend that you disable the automatic update of apps from the App Store on all devices using the PixSell 3 application in a live environment, and that you ensure that any new release is thoroughly tested before rolling out all devices by processing example transactions that conform to your most common workflows.

For example, upgrade a single device and process a transaction that applies:

- Line and order discounts
- Promotions
- Multi-language/currency variants
- Planned re-orders, Credits, or In-store counts

# 4 CONTACTING ASPIN MANAGEMENT SYSTEMS

If you have any queries, or require any further information, please contact us using the following details:

- For United Kingdom general and sales information, email sales@aspin.co.uk or call **+44 (0)1794 500 200**

- For United Kingdom technical information and support, email our Service Desk at support@aspin.co.uk or call **+44 (0)1794 500 205**

- For all Australia and New Zealand queries, email info@aspin.com.au or call **+61 (0)7 3297 7425**
