1 UPDATES

1.1 Changes to the top navigation bar

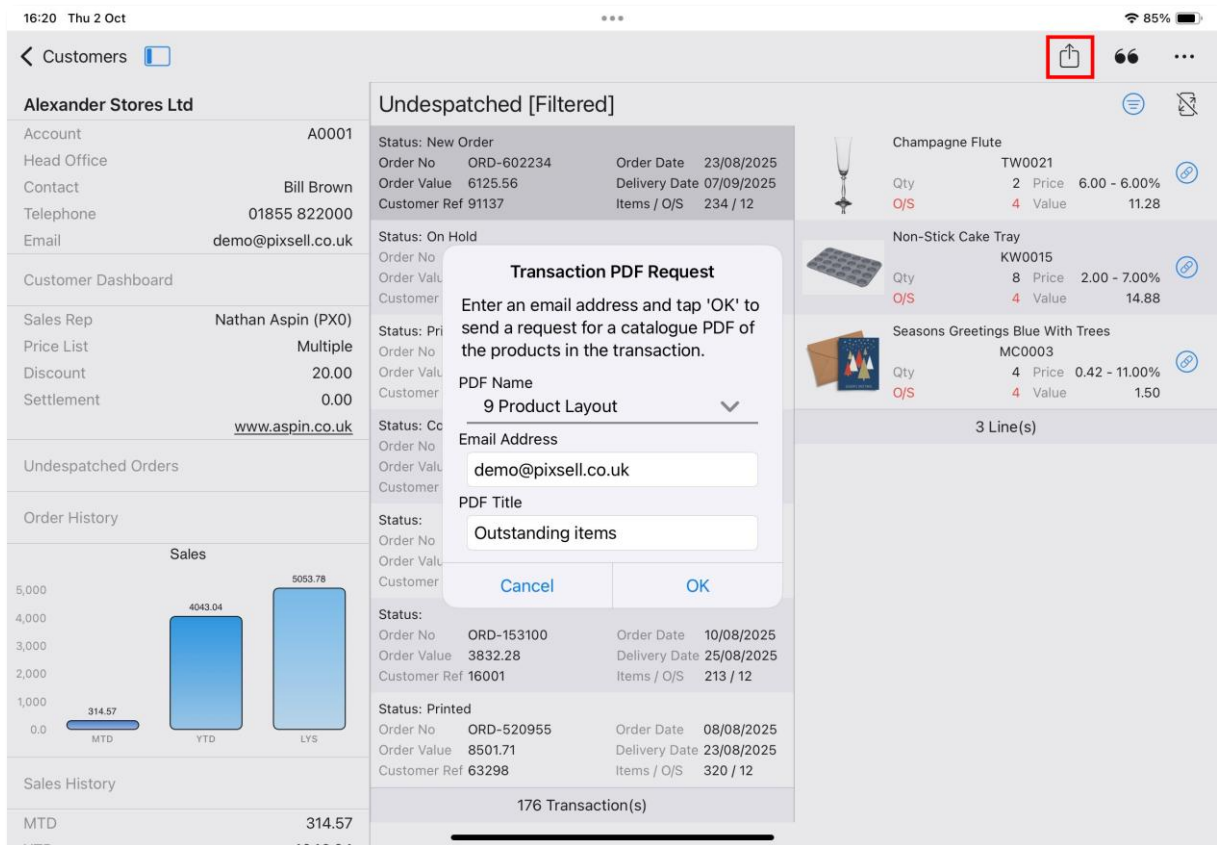

We have made a number of changes to the top navigation bar on all screens. To reduce clutter, some options have been moved to the main menu on the left, or to the three dots action menu on the right (in the example below, the Prospect Actions have been moved to the Customer's action menu). In some cases, we've also added buttons on the left to make it easier to navigate between screens (in the example below, the Basket has been added, as well as the current transaction values if this option has been turned on). A temporary tooltip and an information button will be available for the next few releases to make users aware of this.

Description	Comment
Type	Improvements
Other data	No new data required
Deployment	This is available to everyone

1.2 Ability to request SkooCloud Catalogues from the Undespached report

The export menu in the Undespached orders report has a new option to 'Request a Catalogue PDF' from the SkooCloud PIM. The products in the emailed PDF will be as per the filters you've set on the report. This could for example be useful to do a PDF export of the outstanding products on an order, and those products only, rather than all the products on the order.

Description	Comment
Type	New feature
Other data	Requires SkooCloud PIM templates to be setup
Deployment	This is available to everyone using SkooCloud Plus or Enterprise

1.3 Other Improvements

- We've added the possibility to make transaction signatures mandatory. Before, you could only set a warning when no signature was entered, but you could still continue.
- We've created a way to make large pieces of text in the Customer Details panel use the whole width of the panel, by showing them below the label rather than next to it. This would require a small change to your configuration.
- When resizing PixSell 3 to a very small size in iPadOS 26, if the catalogue view is set to horizontal paging, it will automatically change to vertical scrolling, so that the catalogue is still usable.
- The menu icons for the Product List and Dashboard have been changed to make them clearer and less similar.

1.4 Bug Fixes

- Resolved a small alignment issue in the Sync Summary.
- Fixed some display issues with spotlight badges.

2 UPDATE HISTORY

Summary of features and changes included in recent PixSell 3 releases:

Version	Release date	Summary
3.55	August 2025	Bug fixes and improvements.
3.54	July 2025	-Ability to request CSV exports from SkooCloud -Other Improvements -Bug Fixes

3.39	June 2024	-New options in the customers' Advanced Filters for invoices and credits -Information text shown beneath the transaction Signature Capture box -Other improvements and Bug fixes

3 BEFORE YOU UPGRADE

3.1 Why upgrade?

Keeping PixSell up-to-date is crucial for several reasons:

- Our updates often include important security patches that protect against new vulnerabilities and threats. By staying current, the risk of malware, hacking, or data breaches is reduced.
- PixSell updates typically introduce new features, improvements, and bug fixes that enhance usability and performance. Outdated versions of PixSell may experience compatibility issues with newer operating systems or devices, leading to crashes or malfunctions.
- Our developers frequently optimise apps for speed and efficiency through updates, ensuring a smoother and more enjoyable user experience.

Therefore, regularly updating mobile apps is essential for maintaining security, functionality, and overall user satisfaction.

3.2 Supported devices

PixSell 3 now requires iOS 17 or above. This allows us to take advantage of the latest features and security enhancements, ensuring a smoother and more reliable experience. If your device does not support iOS 17, you will still be able to use older releases of PixSell 3 (up to version 3.50), but newer updates and features won't be available.

3.3 Testing advice for PixSell 3 administrators

Whilst we make every effort to thoroughly test each new release, there is always a possibility that upgrading without testing may have an adverse impact on your particular business processes. Our advice is therefore that you review this version before instructing users to upgrade. This will ensure minimal interruption to your PixSell 3 services.

As best practice, we therefore recommend that you disable the automatic update of apps from the App Store on all devices using the PixSell 3 application in a live environment, and that you ensure that any new release is thoroughly tested before rolling out all devices by processing example transactions that conform to your most common workflows.

For example, upgrade a single device and process a transaction that applies:

- Line and order discounts
- Promotions
- Multi-language/currency variants
- Planned re-orders, Credits, or In-store counts

4 CONTACTING ASPIN MANAGEMENT SYSTEMS

If you have any queries, or require any further information, please contact us using the following details:

- For United Kingdom general and sales information, email sales@aspin.co.uk or call **+44 (0)1794 500 200**
