1 UPDATES

1.1 Copy To Clipboard (For Fast Lines)

This new option appears in the dashboards for Sales History, Order History and Undespatched. When tapping it, the product codes and quantities of the transaction will be copied, so they can then be pasted into Fast Lines for a new order. If you've applied any filters to the report, thereby reducing the number of products shown, only those products will be copied across, so that you can copy exactly what you need. The advantages of this feature compared with 'Add To Order' is that you can edit the list of products or their quantities before using Fast Lines, and you could also paste them into another app in split-screen for reference when entering a new order in PixSell, or paste them into an email.

Description	Comment
Type	New Feature
Other data	No new data required
Deployment	This is available to everyone

1.2 Other Improvements

- The 'Add To Order' and 'Filter Product List' options are now available when looking at historical transactions for different customers (previously it only worked for the same customer as the current order).

1.3 Bug Fixes

- The menu button on the presentation screen wasn't showing when in portrait orientation.
- Charts in the customer details panel didn't display properly when there were negative values.
- In certain cases, the total order value shown in the taskbar wasn't updating immediately.
- On first installation, the presentation screen didn't show straight away.
- Secondary presentation screens were not displaying correctly.

2 UPDATE HISTORY

Summary of features and changes included in recent PixSell 3 releases:

Version	Release date	Summary
3.56	October 2025	-Changes to the top navigation bar -Ability to request SkooCloud Catalogues from the Undespached report -Other Improvements -Bug Fixes

3.40, 3.41	August 2024	-'Request Catalogue PDF' feature available in more places -Other Improvements -Bug Fixes

3 BEFORE YOU UPGRADE

3.1 Why upgrade?

Keeping PixSell up-to-date is crucial for several reasons:

- Our updates often include important security patches that protect against new vulnerabilities and threats. By staying current, the risk of malware, hacking, or data breaches is reduced.
- PixSell updates typically introduce new features, improvements, and bug fixes that enhance usability and performance. Outdated versions of PixSell may experience compatibility issues with newer operating systems or devices, leading to crashes or malfunctions.
- Our developers frequently optimise apps for speed and efficiency through updates, ensuring a smoother and more enjoyable user experience.

Therefore, regularly updating mobile apps is essential for maintaining security, functionality, and overall user satisfaction.

3.2 Supported devices

PixSell 3 now requires iOS 17 or above. This allows us to take advantage of the latest features and security enhancements, ensuring a smoother and more reliable experience. If your device does not support iOS 17, you will still be able to use older releases of PixSell 3 (up to version 3.50), but newer updates and features won't be available.

3.3 Testing advice for PixSell 3 administrators

Whilst we make every effort to thoroughly test each new release, there is always a possibility that upgrading without testing may have an adverse impact on your particular business processes. Our advice is therefore that you review this version before instructing users to upgrade. This will ensure minimal interruption to your PixSell 3 services.

As best practice, we therefore recommend that you disable the automatic update of apps from the App Store on all devices using the PixSell 3 application in a live environment, and that you ensure that any new release is thoroughly tested before rolling out all devices by processing example transactions that conform to your most common workflows.

For example, upgrade a single device and process a transaction that applies:

- Line and order discounts
- Promotions
- Multi-language/currency variants
- Planned re-orders, Credits, or In-store counts

4 CONTACTING ASPIN MANAGEMENT SYSTEMS

If you have any queries, or require any further information, please contact us using the following details:

- For United Kingdom general and sales information, email sales@aspin.co.uk or call **+44 (0)1794 500 200**
- For United Kingdom technical information and support, email our Service Desk at support@aspin.co.uk or call **+44 (0)1794 500 205**
- For all Australia and New Zealand queries, email info@aspin.com.au or call **+61 (0)7 3297 7425**
